Nashua Access Control Solutions

NASHUA

saving you time. saving you money. putting you first.

Nashua and ViRDI: Setting the standard

Simplicity, quality and benefit – this is what we look for when introducing new lines of business and brands into the Nashua group. It is what underpins our brand promise of putting our customers first – as well as saving them time and money.

Over the past 40 years, our business has evolved with the market and its needs in order to ensure that we are consistently in a position to support and add value, as well as offer our customers integrated solutions for every aspect of their business and office environment. Year-on-year our lines of business expand in order to cover all areas and needs within the business environment ensuring that we can offer our new and existing customers total business support.

The partnering with Sensor Security in 2016 is one such move. Sensor Security are the leading importers and distributors of the leading provider of biometric core technology, ViRDI. The ViRDI Series has set the benchmark for a user-friendly fingerprint/facial recognition product line for Access Control and Time & Attendance with its top notch proprietary algorithm and technology, and as such, is trusted by organisations in 80 countries worldwide.

Solutions & Benefits

For decades, access control systems were considered a security tool that let authorised personnel enter a building or area. While many people still think of access control in these terms, advanced access control systems boast a variety of tools and benefits that are often overlooked. Beyond traditional security, access control systems can help any organisation increase operational efficiencies and reduce costs by enabling integration with a large variety of workforce products and solutions.

Easy integration is designed to leverage your existing employee demographic data to reduce manual entry steps and the chance for clerical errors. Individual settings for each employee can be defined for which doors the individual has access to, but layers of restrictions can be applied based on schedules, device conditions and much more.

The ViRDI Access Control Solution comprises of a range of intelligent Terminals / Controllers and Management Software addressing the requirements of large, medium and small enterprises. ViRDI's access solutions replace conventional keys and passwords with Fingerprints, Face Recognition and RF Cards, for improved convenience and security. ViRDI can be confidently used for a simple single door access solution to a large corporate international solution with hundreds of access areas.

NASHUA

saving you time. saving you money. putting you first.
